

INTRODUCTION TO DATA SCIENCE AND MACHINE LEARNING

Date: 4th July, 2022

Duration: 12 weeks | Online

Level: **Beginner to Intermediate**

Focus Areas: **Decision Making
and Data Monetization**

Prerequisites: **No Experience
Required**

Course Topics :

DATA CLEANING, DATA ANALYSIS, SQL, PYTHON, R, POWER BI, MACHINE LEARNING

After the course the students will be able to:

- Consume, transform and Generate insights from multiple data sources for decision making
- Understand Data Science Process
- Build Machine Learning Models using R and Python to solve real world problems
- Deploy Machine Learning Models to production
